

# Zaptec Go

works with any car

No matter what you drive or where you're going, Zaptec Go is the surest way to power your journey. Built on leading edge Norwegian green tech, we've created the world's smallest 22 kW (that's max power) charger, that's as smart on the inside as it is simple on the outside.

## Explore Zaptec Go

### **Fits everyone**

Fits all electric cars and homes. Zaptec Go adapts its maximum charge to your car's capacity.

### **Smart, small and safe**

At Zaptec we're as passionate about your safety as we are about electric power. Zaptec Go leads the EV charging market in safety and is certified with the highest safety standards.

### **Future-proof and up-to-date**

Packed with state-of-the-art tech, and always online with WiFi or 4G LTE-M, Zaptec Go keeps itself up-to-date with the latest functions and updates. All you have to do is charge your car and your next car, and your next car.

### **5 year warranty**

Zaptec Go is built to last. It is designed, developed and manufactured in Norway, for Norwegian conditions.

# Smart, small and safe

## Faster charging

Charge up to 22kW, which gives you a mileage of about 100 km after one hour of charging.

## The market's safest charger

Certified with the highest safety standards.

## Future-proof and up-to-date

WiFi or 4G LTE-M, keeps itself up-to-date with functions and updates itself up-to-date with the latest functions and updates.

## Beautifully simple

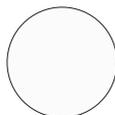

With function-lit socket and RFID chip possibility
